We invite applications for a

Doctoral Student

(PhD Candidate) position

at the Institute for Work and Health (Institut de Santé au Travail, IST) for the project

Prolonged performance-related psychophysiological activation in high- and low-anxious music students

The IST is a non-profit higher education and research institute devoted to occupational health. The research project is an investigation on music performance anxiety, in which important questions about the cognitive, emotional and physiological manifestations associated with a stressful solo performance in high-anxious and low-anxious university music students are addressed. The project is conducted in collaboration with several research centers in Switzerland and Germany.

Job type: This is a 100% job. Job-sharing is not possible.

Requirements for this position:

- advanced University degree (e.g., MA, Diplom, Lizenziat)
- knowledge and interest in psychophysiological experimentation and ambulatory assessment
- strong interest in empirical research
- very good knowledge of French, German, and English (written and spoken)
- excellent interpersonal and communication skills
- ability to solve problems and to work independently
- interest in the life and concerns of musicians (personal musical experience is beneficial)
- interest in occupational health issues

Workplace: Lausanne, Switzerland

Expected entrance: January 2012

Duration: 3 years

Application: Candidates must send their applications (letter of interest, CV, and if possible 2 letters of recommendation) by regular mail or e-mail to:

Ms. Monique Nobel
